

FaunOS: Community Support

Support is available using collaborative tools such as the forums and wiki. Your feedback has been instrumental in working out kinks, fixing bugs, documenting how-tos (or finding out what needs to be documented), and generally directing product path through your suggestions.

- **Forums**

Right now the [forums](#) are your best tool for getting information and resolving issues.

- **Wiki**

Check out our [wiki](#) for common answers to common questions. Much of the information there is garnered from the discussion forums. Stay tuned as we build it.

Help!

Thank you all for contributing to the [wiki](#). Please continue sharing your knowledge! Translations are especially welcome!

- **Development**

You can find our sources and modifications in our svn repo. If you'd like to contribute code, do let us know!
